1 Year Warranty and after sales maintenance

Purifies

Rainwater

Well water

Tap water

River water

How We Work

1

Filter elements (Nazava PROT3CT), taps, hoses and instruction manuals are shipped from Jakarta to Ukraine (via The Netherlands.)

2

Food contact safe containers are purchased from a factory in Dnipro assisting Ukrainian Economy.

3

The complete filter sets are assembled in Uman (Ukraine) by IDP's who receive a standard Ukrainian salary.

This is organized and managed by the SaveUA foundation, which is associated with the Ukrainian Agri Council, a trusted partner of De Leeuw Kyiv Foundation.

4

Ukrainian people (IDP's and locals) distribute the for a regular salary.

This is also managed by SaveUA who help identify populations that are most in need.

A complete set consists of: the Nazava PROT3CT filter element, a tube, a tap, 2 buckets and an instruction manual.

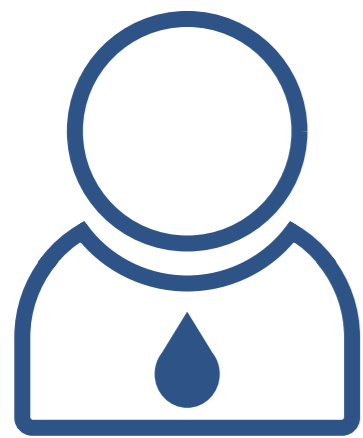

The Distribution

Area	Distributed
Vysokopilya	500
Novovorontsovka	500
Mykolaiv City.	1000
Odesa	1000
Mykolaivska region (urban)	1500
